## Don't let rising energy costs erode your profits when heating is included in your leases!

**"Keep energy costs under control and increase your profits"**

Now is the time to take action against increased energy costs caused by tenants setting heating temperatures higher than necessary.

### **Introducing Temp-Limiter™ from Jackson Systems.**

Temp-Limiter is the low cost, easy to install, temperature limiter that prevents the heating temperature from exceeding a fixed limit, even if the tenant sets the thermostat higher. Model TL-73H limits heating at 73° and Model TL-70H limits heating at 70°. A cooling model is also available. Contact us toll-free at 1-888-652-9663 for complete details and pricing.
