

TrueZONE® Damper New Product Overview

The new TrueZONE Damper is a direct replacement for today's legacy dampers. With a more intuitive design, the TrueZONE damper allows for an easier installation with less troubleshooting. The TrueZONE damper also delivers an improved motor and gearing to insure long life and reliable operation even in high stress applications.

Features

Two position, 24 Vac power close, spring return forced air zoning damper.

Adjustable Range Stops that are simple to use and easier to understand.

Mechanical Position Indicator for the damper blade.

LED Indicators show operation.

Push-In Terminals – Same as on the TrueZONE Panel.

Quieter operation through improved internal design that allows for a slower return.

With R8 insulation compatibility, the TrueZONE damper is designed to pass energy efficiency audits.
