

Product Description

The TW155A is a heating/cooling corrosion resistant line voltage thermostat for controlling ventilation equipment in wash-down and mildly corrosive atmospheres.

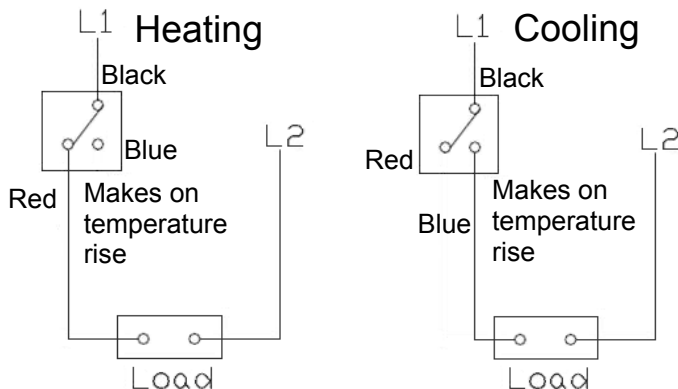

The thermostat utilizes a two piece molded plastic enclosure with all exposed metal hardware being stainless steel. The thermostat, adjusting knob and sensing coil are attached to the enclosure cover, allowing the box to be mounted and the wiring to be connected without damaging the control. The wiring entrance is located at the bottom of the enclosure.

Product Specifications

Output:	SPDT contact
Contact Rating (Voltage):	125/250/277 Vac
Contact Rating (HP):	3/4 HP @ 125 Vac, 1 1/2 HP @ 250/277 Vac
Contact Rating (Current):	22 Amps
Connections:	Wires
Set-point Range:	40 to 110°F
Temperature Differential:	Non-adjustable
Housing Size:	7 3/8"H x 3 1/4"W x 3 5/16"D
Housing Materials:	Molded plastic
Cover Fasteners:	Stainless steel screws
Cover Seal:	Tongue and groove gasket fitting
Color:	Gray
Exterior Hardware:	Stainless steel
Mounting:	4 3/16" hole centers
Coil Capillary:	Tin plated
Protection:	NEMA 4X Construction
Agency Approvals:	ETL Listed
