

MS60 Mini Split Condensate

Beckett's Mini Condensate Pump is the perfect solution for Mini Split systems up to 36,000 BTU. It features a recommended max lift of 33' with a max suction lift of 4' which allows it to be installed in out of the way locations. It comes with a vibration/sound isolation mounting pad and semi clear condensate reservoir to easily see if maintenance is required. The reservoir features a reliable reed switch with a 5' power cord. No kink silicone discharge tubing (5' - 1/4" ID) is also included. This pump is rated for water temps 41 - 104° F, 50% duty cycle.
