Quick Set up Guide Android and Apple Platforms

The following guide will enable you to set up your thermostat quickly. Configuration is set through WiFi networks, one being your home network, the other programmed into the thermostat. Bluetooth is not used. Apple iOS is shown but is the same for Android set up and use.
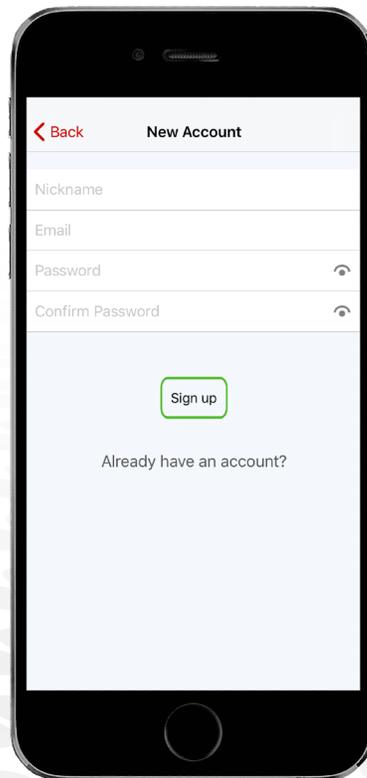

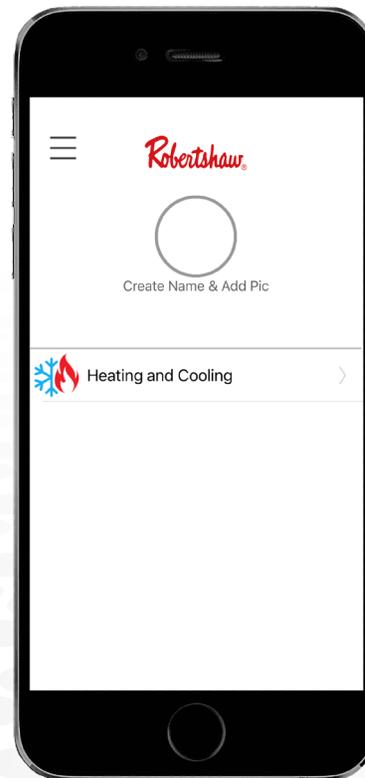

Add Device (RS10420T)

Step 1

When launching the app the first time, tap **Create Account**.

Step 2

Complete the New Account fields. Tap **Sign up**.

Step 3

Enter your name and add your image.

Step 4

You can change your thermostat name later.

Tap **+ Add New Device** at the bottom.
