

Warning Watchdog™

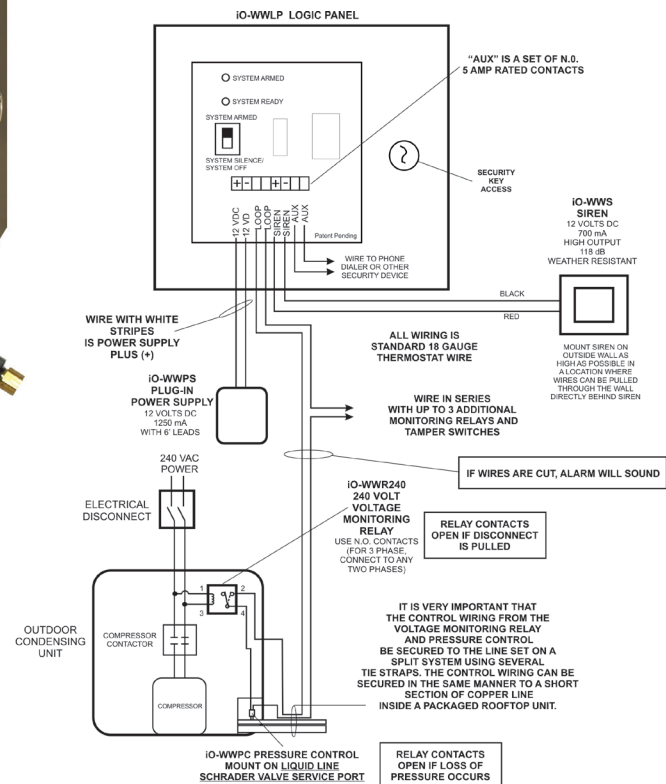

Condensing Unit Alarm System

The condensing unit alarm system sounds a loud siren and can also trigger a central alarm, phone dialer or other device. It can monitor up to 4 condensing units with one panel. This easy-to-install condensing unit alarm system can be used with packaged or split systems. It will alarm if refrigerant loss is detected, the disconnect is pulled or wiring is cut.

Why Warning Watchdog over other condensing unit theft deterrent products?

- System LEDs indicate system status
- Easy-to-read labeled terminals and daisy chain wiring make installing simple
- 118dB siren and pressure switch included with every system
- Daisy chain wiring
- No soldering required
- Closed loop system means alarm alerts if power or wiring is cut

Warranty: 1 years
