

Econo-Pack™

Economizer

The Econo-Pack is an integrated economizer package that is easy to install. Econo-Pack is designed to provide maximum energy savings during cooling cycles by utilizing outside air whenever the temperature and humidity are within a selected enthalpy range. Each Econo-Pack should include a logic module, discharge air sensor, enthalpy sensor, two-stage thermostat, direct-coupled actuators and high-quality dampers. Jackson Systems can provide a complete package to meet your specific application.

Features and Benefits:

- Easy installation and set up
- Clear and simple wiring diagrams
- Reduces energy consumption
- Reduces equipment maintenance
- Extends equipment life
- Optional CO₂ sensors
- Optional hot water coil freeze protection thermostat

Warranty: 5 years

Econo-Pack™

Commercial

Specifications:

Logic Panel	EP-LM
Discharge Air Sensor	EP-DAS
Enthalpy Sensor	EP-ES
Two-Stage Thermostat	Commercial thermostat with economizer terminal
Sizes	Available in multiple sizes. Tight seal dampers available.
Damper Actuator Type	24VAC, 2 - 10VDC

Contractor Friendly
