

## CONDENSING UNIT ALARM SYSTEM

The Warning Watchdog is a condensing unit alarm system that sounds a loud siren and can also trigger a central alarm, phone dialer or other device. It can monitor up to 4 condensing units with one panel. This easy-to-install condensing unit alarm system can be used with packaged or split systems. It will alarm if refrigerant loss is detected, the disconnect is pulled or wiring is cut.

### Warranty:

1 Year

### Warning Watchdog Packaged Hardwired Kits

ITEM	DESCRIPTION
<b>iO-WW1</b>	Logic panel with key lock, siren cut-off timer and siren silence switch Kit includes (1) iO-WWLP, (1) iO-WWPS, (1) iO-WWS, (1) iO-WWR240, (1) iO-WWPC
<b>iO-WW2</b>	Logic panel with key lock, siren cut-off timer and siren silence switch Kit includes (1) iO-WWLP, (1) iO-WWPS, (1) iO-WWS, (2) iO-WWR240, (2) iO-WWPC
<b>iO-WW3</b>	Logic panel with key lock, siren cut-off timer and siren silence switch Kit includes (1) iO-WWLP, (1) iO-WWPS, (1) iO-WWS, (3) iO-WWR240, (3) iO-WWPC
<b>iO-WW4</b>	Logic panel with key lock, siren cut-off timer and siren silence switch Kit includes (1) iO-WWLP, (1) iO-WWPS, (1) iO-WWS, (4) iO-WWR240, (4) iO-WWPC

### Warning Watchdog Components and Optional Items

<b>iO-WWLP</b>	Logic panel with key lock, siren cut-off timer and siren silence switch; LEDs confirm alarm status
<b>iO-WWPS</b>	Power supply for iO-WWLP logic panel; 12 volts DC - 1500mA
<b>iO-WWPC</b>	Encapsulated pressure control (mounts on liquid line schrader valve service port) Working pressure up to 600 PSI - 3500 PSI burst strength - opens in fall below 10 PSI
<b>iO-WWR12</b>	Optional relay for additional siren. SPDT 12 volt DC relay
<b>iO-WWR240</b>	Voltage monitoring relay - 240/208 volts; Can be used with 240/208 single-phase or 3-phase
<b>iO-WWR480</b>	Optional voltage monitoring relay - 440/480 volts; Can be used with 440/480 3-phase
<b>iO-WWS</b>	Outdoor/indoor siren; 12VDC 118dB output
