

## OUTSIDE AIR DAMPER

### Features and Benefits:

- Used in retrofit or new construction applications to introduce fresh air into a building
- Round damper sizes from 4" to 18"
- Compatible with iO-FAV and CO2-TH
- Direct-coupled, spring-return actuator (power-open/spring-return-closed) available in 24V or 120V
- Modulating actuator option for proportional airflow control
- No-actuator option with a manual mounting plate/lever, for field-installed actuators or manual operation
